We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short installation time saved us weeks of downtime.

The ISemi solar container solution is basically treasure chest that holds the power of the sun. It consists of solar panels that absorb sunlight during the day, storing it in batteries ...

These solar-integrated backup power units combine photovoltaic generation, lithium battery storage, and smart energy control ...

We're excited to introduce our 30kWh solar energy storage system designed to be powerful, compact, and adaptable to a wide range of inverter brands. Here's a closer look at ...

In this article, we'll explore how modular energy storage works, the key technical considerations, and the benefits these systems offer for both emergency response and off-grid ...

These solar-integrated backup power units combine photovoltaic generation, lithium battery storage, and smart energy control into a compact, transportable container--delivering ...

Ideal for remote construction sites, agricultural operations without reliable grid access, municipalities, or as an emergency power backup solution. Quick setup and installation -- fully ...

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency ...

Engineered for resilience, mobility, and clean energy delivery, this portable solar power unit is ideal for

emergency response, off-grid operations, and energy independence.

The 30/42/60kWp Foldable Photovoltaic Container All-In-One integrates high-efficiency PV modules, intelligent energy storage, and modular power management into a single container.

Foldable Photovoltaic Power Generation Cabin is a containerised solar power solution. Combining the features of solar power generation and mobility, it provides electricity all over the world.
