-----

The battery energy storage system market is growing rapidly, breezing past ongoing federal policy headwinds. A report from Rystad ...

Global investment in EV batteries has surged eightfold since 2018 and fivefold for battery storage, rising to a total of USD 150 billion in 2023. ...

Global demand for Li-ion batteries is expected to soar over the next decade, with the number of GWh required increasing from about 700 ...

The increasing reliance on renewable energy sources, such as solar and wind power, also boosts demand for efficient energy storage ...

The increasing reliance on renewable energy sources, such as solar and wind power, also boosts demand for efficient energy storage solutions, making batteries essential ...

BloombergNEF (BNEF) forecasts that developers will add 94 gigawatts (247 gigawatt-hours) of battery capacity this year, a 35% increase over 2024 and the highest ...

This data is collected from EIA survey respondents and does not attempt to provide rigorous economic or scenario analysis of the reasons for, or ...

The battery energy storage system market is growing rapidly, breezing past ongoing federal policy headwinds. A report from Rystad Energy said energy storage ...

This data is collected from EIA survey respondents and does not attempt to provide rigorous economic or

scenario analysis of the reasons for, or impacts of, the growth in large-scale ...

Global investment in EV batteries has surged eightfold since 2018 and fivefold for battery storage, rising to a total of USD 150 billion in 2023. About USD 115 billion - the lion's share - was for ...

S& P Global reports that global lithium-ion battery annual production output surpassed 10 billion cells for the first time in 2024, the ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

BloombergNEF (BNEF) forecasts that developers will add 94 gigawatts (247 gigawatt-hours) of battery capacity this year, a 35% ...

This Review details the range of advanced battery technologies under development and their associated supply chain inputs, sketches out challenges facing the domestic supply chain, ...

S& P Global reports that global lithium-ion battery annual production output surpassed 10 billion cells for the first time in 2024, the cause of both the oversupply and cost ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.
