Will Chile be able to develop energy storage projects in 2024?

In 2022, Chile passed an energy storage and electromobility bill, which made stand-alone storage projects profitable, but the market is still expecting new rules on capacity payment for storage projects, which are to be approved in 2024. Chile has also put in place an auction procedure to award public land for the development of BESS projects.

How many energy storage projects are in Chile?

According to a December 2023 publication on the InvestChile website, the country had 23 approved energy storage projects with a total of 3,000 MW of capacity. Chile is exploring a variety of solutions to keep abreast of the changing energy demand landscape ranging from BESS to innovative projects using CO₂.

Where are Chile's battery energy storage facilities located?

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage. The greatest installed capacity is found in the northern regions of Antofagasta and Tarapacá, the country's solar powerhouses.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.

Uriel Renovables is entering the Chilean energy market with a US\$450 million investment to build four photovoltaic parks totaling 420 MWp, each equipped with lithium-ion ...

Website: <https://zonnepark-ampsen.online>

This article explores the benefits, challenges, and real-world applications of installing energy storage photovoltaic projects in the region, backed by data and actionable insights for ...

Summary: Valparaiso, Chile, is making waves in renewable energy with its groundbreaking energy storage initiative. This article explores how the project integrates solar and wind power, ...

Chile's environmental impact assessment system has approved the 250 MW/1.25 GWh Battery Energy Storage System - BESS ...

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged ...

Limes Renewable Energy has secured the environmental qualification resolution for its Pradera Larga solar and storage project in Chile's Valparaíso Region.

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy ...

California-based Nextracker, along with ENGIE Chile, in May announced an energy initiative called PV and BESS Libúla, which consists of a hybrid park of photovoltaic panels ...

Elsewhere, in 2023, Canadian-owned Innergex, the third-largest renewable energy generator in Chile, ...

Chile's environmental impact assessment system has approved the 250 MW/1.25 GWh Battery Energy Storage System - BESS La Isla project. The La Isla facility will be ...

In March 2024, Atlas Renewable Energy announced it has signed a power purchase agreement (PPA) with Chilean mining giant Codelco for the supply of 375 GWh of energy per ...

California-based Nextracker, along with ENGIE Chile, in May announced an energy initiative called PV and BESS Libúla, which ...

Elsewhere, in 2023, Canadian-owned Innergex, the third-largest renewable energy generator in Chile, inaugurated its first electricity plant in the country, featuring a 50 MW ...
