Yemen's first 120 MW solar plant in Aden now powers up to 170,000 homes, marking a breakthrough in the nation's decades-long electricity crisis.

With regional cooperation and continued investment, Yemen's first solar power plant could be the beginning of a new chapter--one where light and stability gradually return to one ...

Across Yemen, a growing number of farmers are turning to solar power to irrigate their fields, a shift that comes as the country tries to ...

Solar PV and wind turbine technologies can contribute to the global transition towards renewable energy while reaping the benefits of clean, affordable, and sustainable power generation.

The completion of this 6.5 MW project underscores the growing importance of renewables in Yemen's power sector and ...

With the start of the Yemeni civil war, solar panels found their way into the country fast. On March 23, 2015, Sanaa experienced a major power outage. The Marib Power Plant, which supplies ...

Across Yemen, a growing number of farmers are turning to solar power to irrigate their fields, a shift that comes as the country tries to stave off what the United Nations warns is ...

The completion of this 6.5 MW project underscores the growing importance of renewables in Yemen's power sector and highlights the country's abundant solar resources.

Yemen has been grappling with severe electricity shortages for years, particularly in rural and remote areas where access to the grid is limited.

After a brief introduction into the Yemen conflict, we present facts and figures on Yemen's pre-war energy system. After covering the conflict's effects on energy supply, the article presents ...

UAE-based Global South Utilities, an energy and water infrastructure company, is boosting its solar power generation capacity in Yemen to provide electricity to thousands of ...

With the start of the Yemeni civil war, solar panels found their way into the country fast. On March 23, 2015, Sanaa experienced a major power outage. The Marib Power Plant, which supplies Yemeni cities with energy, went out of service. Consequently, the generator business flourished for awhile. However, due to the unstable conditions in Yemen, generators were not guaranteed to remain functional at all times because of increasing fuel prices and occasional lack of fuel. Yem...

"By reducing dependence on diesel and fuel imports, these solar plants strengthen energy security and open the door for broader development in southern Yemen," said Samir Al ...
