How many 5G base stations are there in China?

2027 master plan - a second 'Set Sail' 5G expansion plan aims for 85% 5G penetration and 75% of network traffic on 5G. The total number of 5G base stations in China reached 4.486 millionas of the end of May (2025),according to data released by the country's Ministry of Industry and Information Technology (MIIT).

How many 5G base stations will China Mobile have in 2025?

China Mobile,the world's largest mobile carrier in terms of subscribers,had previously outlined plans to deploy 340,000 additional 5G base stations in 2025. With these new 5G deployments,China Mobile's total 5G base stations will reach nearly 2.8 millionby the end of 2025.

How many 5G sites are there in China?

Mobile operators in China are ramping up 5G and 5G-A rollouts,with the former now at 4.5 million cell sites and the latter in 300 cities; a new 2027 roadmap will see 75% of mobile data in the country on 5G networks. 5G on 5M sites - China has over 4.486 million5G sites; 5G now comprises more than 35% of total mobile base stations.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

But how many 5G base stations are actually active worldwide? This article dives deep into the numbers, examining deployment trends, regional growth, and what the future ...
