GSL Energy is bringing a solution to Haiti with their solar energy storage systems, providing 24/7 power, lower costs, and disaster resilience. Join us in powering a brighter future ...

MIT researchers developed a new fabrication method that could enable them to stack multiple active components, like transistors and memory units, on top of an existing ...

The MIT Energy Initiative's annual research spring symposium explored artificial intelligence as both a problem and solution for the clean energy transition.

This investment aims to support the installation of 10 MWp of solar PV and 20 MWh of storage in Haiti, enhancing energy reliability and promoting distributed generation in ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

This project marks a significant milestone in Haiti's quest for energy independence. With its focus on sustainability, cost reduction, and job creation, the GSL Energy solar power ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research

portfolio, scale up existing innovations, seek new breakthroughs, and ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...

Amid ongoing humanitarian and security challenges in Haiti, the project aims to support the installation of 10 MWp of solar PV and 20 MWh of storage. It will provide reliable ...

Explore how the new solar power plant installed in Haiti is driving green energy solutions across the Caribbean.

Growing energy demand means the U.S. will almost certainly have to expand its electricity grid in coming years. What's the best way to do this? A new study by MIT ...

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

Alina En#232;ji started with a 30-connection pilot project in 2021. As of late 2024, the company had expanded to 3,000 customers in Haiti's Nord and Artibonite regions and plans to ...
