---

A recent innovation in solar technology is accelerating circular design in the clean energy sector. SOLARCYCLE, a US-based solar panel recycler, joined forces with Arizona ...

This month, we made progress at our Circular Solar Campus in Cedartown Georgia, a facility designed to recycle retired panels and manufacture new solar glass sheets from ...

In a significant advancement for sustainable solar technology, SOLARCYCLE has partnered with Arizona State University (ASU) to create an innovative solar panel composed of ...

In Georgia, it's building a factory to turn recycled solar glass into glass for new panels. Until recently, when a solar panel reached the end of its useful life--after 25 or 30 ...

Researchers at SolarCycle and Arizona State University (ASU) demonstrated a solar panel using 50% recycled glass from old panels. The research team showed how using ...

In Georgia, it's building a factory to turn recycled solar glass into glass for new panels. Until recently, when a solar panel reached the ...

Glass makes up about 75% of a solar panel's weight, making it the most abundant recovered material. The recycling rates for glass are impressive, with more than 90% typically ...

Researchers at SolarCycle and Arizona State University (ASU) demonstrated a solar panel using 50% recycled glass from old panels. ...

Researcher Kate Fisher built and tested two sets of panels: one using only new glass, and the other using a 50/50 mix of new and ...

A new study has found that solar panels, which are made with 50% recycled glass, perform just as well as new ones.

A recent innovation in solar technology is accelerating circular design in the clean energy sector. SOLARCYCLE, a US-based solar ...

Researcher Kate Fisher built and tested two sets of panels: one using only new glass, and the other using a 50/50 mix of new and recycled glass cullet. The recycled material ...

Glass makes up about 75% of a solar panel's weight, making it the most abundant recovered material. The recycling rates for glass are ...

Solar panel recycling outfit SolarCycle today announced plans to start a solar glass manufacturing facility in Cedartown, Georgia, that would use recycled materials from retired ...

In a groundbreaking development for renewable energy, a collaborative study by SOLARCYCLE and Arizona State University has revealed that solar panels crafted from ...
