Greek utility PPC Group has officially broken ground on a hybrid solar and battery energy storage system (BESS) on the island of Astypalea, aiming to cover more than 80% of local electricity ...

These hybrid projects combine wind generation with energy storage systems, providing greater value to the grid and potentially higher returns for investors. Several Greek ...

The meeting of the Special Standing Committee on Environmental Protection was chaired by Dionysia-Theodora Avgerinopoulou and focused on the critical issue of RES and ...

The meeting of the Special Standing Committee on Environmental Protection was chaired by Dionysia-Theodora ...

The European Commission has approved EUR1 billion (\$1.08 billion) of Greek measures under EU state-aid rules to support two utility ...

The Seli Project entails the construction of a 309 MW photovoltaic unit with an integrated lithium-ion battery energy storage system. This project aims to optimise electricity generation and grid ...

The European Commission has approved a EUR1 billion (US\$1.1 billion) state aid measure for Greece to support two solar-plus-storage projects.

The European Commission approves EUR1 billion in state aid for Greece's Faethon and Seli solar projects, set to add 813 MW of ...

Greece will invest EUR1 billion (\$1.1 billion) to support the installation of 813 MW new solar PV capacity, along with integrated storage solutions, after securing a go-ahead from the ...
