When can a solar project start construction?

Solar projects with a maximum net output of 1.5 MWs or less can continue to begin construction after September 2, 2025, and before July 4, 2026, by incurring 5% of project costs. All wind and solar projects that have not started construction by July 4, 2026, must be in service by December 31, 2027.

When do wind and solar projects start?

Wind and solar projects over 1.5 MWs that intend to establish the commencement of construction after September 2, 2025, and before July 4, 2026, must start by performing physical work of a significant nature.

When do wind and solar projects phase out?

(For more information, see this Latham Client Alert.) Under the new law, tax credits for wind and solar projects phase out sooner than those for other technologies, like storage. To qualify, these projects must either be completed by the end of 2027 or begin construction by July 4, 2026.

How long does it take to build a solar or wind farm?

Due to recent regulatory changes, the time taken for the construction and final stages has increased from 18 months to 21 months. What does it take to build a solar or wind farm? We break project lead times down into three stages: 1. Pre-construction - the developer designs the project and seeks approvals 2.

Discover the phases and timelines in our guide on how long to build a solar farm, from planning to powering up your clean energy source.

Under the Senate Finance Committee's June 28 th version of the One, Big, Beautiful Bill (the "Bill"), there are several limitations and requirements that would take effect ...

The actual construction of a 1 MW solar power plant is a relatively swift process once everything is in place. With the right resources and ...

The changes made by the One Big Beautiful Bill Act (OBBBA) leave only a short window for solar and wind projects to be eligible for clean electricity tax credits under Sections ...

The actual construction of a 1 MW solar power plant is a relatively swift process once everything is in place. With the right resources and planning, the construction phase typically takes around ...

Wind and solar projects seeking to begin construction before July 4, 2026, must meet stricter qualification criteria for some tax incentives. Wind and solar projects can start ...

The new notice applies to solar and wind facilities that start construction on or after September 2, 2025. It is used to determine if the construction of a wind or solar facility begins ...

Wind and solar projects seeking to begin construction before July 4, 2026, must meet stricter qualification criteria for some tax ...

Since Treasury may have limited flexibility to make those requirements materially more restrictive due to OBBBA's requirements, developers who rely on heavily FEOC-based ...

This guide walks you through the entire wind farm construction process, from initial planning to operation, and highlights why ...

This guide walks you through the entire wind farm construction process, from initial planning to operation, and highlights why JMS Energy is a trusted partner in renewable energy ...

If you're a renewable energy developer, it's vitally important to know how long it normally takes to get a project up and running. It's also a key piece of data for investors and ...

The task of constructing an energy storage power station involves a complex interplay of factors affecting the timeline. Various elements like project type, site selection, ...

If you're a renewable energy developer, it's vitally important to know how long it normally takes to get a project up and running. It's also ...

Under the Senate Finance Committee's June 28 th version of the One, Big, Beautiful Bill (the "Bill"), there are ...
