PERC monocrystalline bifacial double-glass solar modules

The Bifacial Mono PERC Double Glass Module combines bifacial technology with monocrystalline PERC cells encapsulated between two layers of glass.

Mogen Solar MG10 Perc monocrystalline single glass 540-555Watt photovoltaic solar panel. The new series integrates 182mm silicon wafers, with perc, multi-busbar cell technology and high ...

Featuring double glass lamination and solid PID resistance, our modules ensure a 30-year product lifetime with minimal power degradation, ...

Featuring a bifacial double-glass structure and black frame, their half-cell design improves durability, minimizes shading losses, and maximizes energy output from both sides, combining ...

Assembled with 11BB bifacial PERCIUM cells and gapless ribbon connection technology, these double glass modules have the capability of converting the incident light from the rear side ...

Mogen Solar MG10 Perc monocrystalline single glass 540-555Watt photovoltaic solar panel. The new series integrates 182mm silicon wafers, ...

Boviet Solar"s Vega Series(TM) Mono-Bifacial solar modules are distinguished by their advanced technology, exceptional quality, and unwavering reliability. Utilizing cutting-edge ...

Featuring a bifacial double-glass structure and black frame, their half-cell design improves durability, minimizes shading losses, and maximizes ...

Two popular options in today"s market are mono PERC and bifacial solar panels. Understanding their

differences can help you choose the right technology for your project.

Based on 210mm silicon wafer and 132 half-cut mono-crystalline PERC cell, the Evo 6 Series photovoltaic panels comes with several innovative design features allowing higher output ...

Based on 210mm silicon wafer and 132 half-cut mono-crystalline PERC cell, the Evo 6 Series photovoltaic panels comes with several innovative ...

MBB and half-cell design to reduce shadow effects, improve module reliability and reduces loss. The dual-glass structure effectively reduces the risk of ...

MBB and half-cell design to reduce shadow effects, improve module reliability and reduces loss. The dual-glass structure effectively reduces the risk of cell cracking and improves the ...

Featuring double glass lamination and solid PID resistance, our modules ensure a 30-year product lifetime with minimal power degradation, reducing operational costs and ensuring long ...

Boviet Solar"s Vega Series(TM) Mono-Bifacial solar modules are distinguished by their advanced technology, exceptional quality, and unwavering ...

Based on 210mm silicon wafer and 120 half-cut mono-crystalline PERC 12BB solar cell, the Evo 6 Series photovoltaic panels comes with several innovative design features allowing higher ...
