-----

These include 14 new projects and three amendments, featuring technologies such as wind, solar, hydro, geothermal, and battery energy storage systems (BESS). Of the 17 ...

Long overlooked as an energy powerhouse, the country is now making waves with pumped-storage hydroelectric power (PSHP), drawing in billions from some of its wealthiest ...

A total of 111 bidding projects were awarded, covering solar, wind, and projects with energy storage. Solar, wind, and energy storage projects attracted significant attention in this ...

Eight more integrated solar and energy storage initiatives, along with two onshore wind projects, made the cut since the department ...

The Board of Investments (BOI) in the Philippines has given a "green lane certificate" for a solar and storage project said to be the ...

The Energy Regulatory Commission (ERC) has just approved numerous renewable energy and battery storage projects with the goal of ...

MANILA -- The Department of Energy (DOE) on Wednesday released the Terms of Reference (TOR) for the fourth round of the Green Energy Auction (GEA-4), bidding a total ...

The Board of Investments (BOI) in the Philippines has given a "green lane certificate" for a solar and storage project said to be the largest in the world, enabling it to ...

The Energy Regulatory Commission (ERC) has just approved numerous renewable energy and battery storage

projects with the goal of strengthening the Luzon grid, ...

BNEF expects a typical solar project with four-hour lithium-ion battery-based energy storage to become cost-competitive against new thermal power plants this year. Onshore wind ...

MANILA -- The Department of Energy (DOE) on Wednesday released the Terms of Reference (TOR) for the fourth round of the Green ...

Long overlooked as an energy powerhouse, the country is now making waves with pumped-storage hydroelectric power (PSHP), ...

Given the limited scale of solar in the Philippines, it is perhaps surprising that there are plans to develop one of the world's biggest combined PV and energy storage projects in ...

Eight more integrated solar and energy storage initiatives, along with two onshore wind projects, made the cut since the department of energy released a preliminary tally after ...

Summary: The Philippines is rapidly emerging as a hotspot for renewable energy development, driven by its abundant wind, solar, and energy storage potential. This article explores current ...
