What is a portable charging system?

Portable charging is an ideal solution for operators who are unable to install permanent infrastructure on a site, whether because of lease agreements, ongoing site transformation, or other reasons. When containers are removed, site restoration is minimal because most of the equipment is located within the container.

What is a containerized charging capsule?

The containerized charging capsule allows customers to utilize semi-permanent, portable charging to account for unpredictable changes in operations, offering fleet operators the ability to charge electric vehicles from any location.
