Why is battery storage important in Romania?

This policy shift aligns Romania more closely with EU energy goals, where battery storage is increasingly recognized as an enabler of grid flexibility, renewable integration, and energy security.

Why is Romania removing double taxation on energy storage?

Romania's elimination of double taxation on energy storage is more than a technical adjustment--it's a strategic inflection point. By aligning its regulatory framework with market realities, the country is removing one of the last structural barriers to widespread BESS adoption.

Will Romania become a European energy storage center?

A EUR50 million project promises to turn Romania into a European energy storage center, thanks to an agreement between US giant Lockheed Martin and Romanian company Sinteza SA.

Why should investors invest in energy storage in Romania?

This step improves regulatory transparency, another key factor investors consider when committing capital. Romania's ambitions for energy storage are growing rapidly. The country plans to install 5 GW of battery energy storage capacity by 2026, a massive leap from its current level, which reached around 400 MWh as of April 2025.

Deals from Nova Power & Gas and Visual Fan signal a market surge. Enterprising companies in Romania's energy storage market have ...

Nova is currently the national leader in energy storage capacity, with 240 MWh already operational. The company is also heavily investing in electricity generation facilities, ...

Romania's elimination of double taxation on energy storage is more than a technical adjustment--it's a

strategic inflection point. By aligning its regulatory framework with market ...

Nova Power & Gas, part of the E-INFRA Group, has announced the commissioning and start of commercial operations of the largest battery energy storage ...

Romania has launched a new non-refundable funding program for battery energy storage systems to the tune of EUR150 million (\$158 million), this time dedicated to standalone ...

This article discusses how grid-scale battery storage is revolutionizing the U.S. power sector by addressing the challenges of ...

If Romania can gain an advantage in the energy storage battery and photovoltaic industry and attract industrial capital from inside and outside the EU to invest in this field, it will help the EU ...

A EUR50 million project promises to turn Romania into a European energy storage center, thanks to an agreement between US ...

This article discusses how grid-scale battery storage is revolutionizing the U.S. power sector by addressing the challenges of integrating intermittent renewable energy sources.

Nova is currently the national leader in energy storage capacity, with 240 MWh already operational. The company is also heavily ...

Romania's elimination of double taxation on energy storage is more than a technical adjustment--it's a strategic inflection point. By ...

Nova Power & Gas, a local energy company part of the E-INFRA group, has confirmed its investment in the largest battery energy storage facility in Romania. This ...

As Romania continues its energy transition, battery storage will evolve from a nice-to-have to an absolute necessity. The companies and countries that recognize this reality ...

Deals from Nova Power & Gas and Visual Fan signal a market surge. Enterprising companies in Romania's energy storage market have expansion, with recent announcements ...

A EUR50 million project promises to turn Romania into a European energy storage center, thanks to an agreement between US giant Lockheed Martin and Romanian company ...
