In July 2024, the Romanian government passed a new law, 255/2024, which specifies that owners of PVs with a capacity of 3kW to 200kW must install at least 30% of their ...

This article discusses how grid-scale battery storage is revolutionizing the U.S. power sector by addressing the challenges of ...

An advanced draft of the present report was critically discussed with relevant Romanian stakeholders (TSO, energy regulator, Ministry of Economy, Energy and the Business ...

This report analyses the potential of some of the main energy storage technologies, presenting their respective advantages and disadvantages that need to be considered when evaluating ...

This study investigated the feasibility of energy storage technologies that are commercially available on the Romanian market by using the levelized cost of storage (LCOS) method.

Total BESS Prices in US Market to Fall a Further 18% in In this Energy Storage News article, CEA forecasts an 18% price decline for containerized Battery Energy Storage System (BESS) ...

State-owned Hidroelectrica, the largest electricity producer in Romania, wants to install a battery storage system at Iron Gate 2 (Portile de Fier 2) on the Danube.

This article discusses how grid-scale battery storage is revolutionizing the U.S. power sector by addressing the challenges of integrating intermittent renewable energy sources.

Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable

Romanian school uses 20kW energy storage container
