Australian company PowerCap has officially launched into the European market with its sodium-ion battery technology. Already in use ...

ATENA+ is scaling up sodium-ion batteries to make energy storage safer, more affordable, and environmentally sustainable, shaping Europe's green energy future.

Sodium is essential to all living things, and humans have known this since prehistoric times. Our bodies contain about 100 grams, but we are constantly losing sodium in different ways so we ...

The EU-funded SPRINT project is set to revolutionize the stationary energy storage sector by advancing sodium-ion battery ...

It is a soft, silvery-white, highly reactive metal. Sodium is an alkali metal, being in group 1 of the periodic table. Its only stable isotope is ^{23}Na . The free metal does not occur in nature and ...

Discover the significant advancements in European sodium-ion battery initiatives in 2024, with key projects and investments.

A Key Step for European Energy Storage The ATENA+ project aims to produce sodium-ion battery cells in Europe, demonstrating their ...

Table salt accounts for 90% of the sodium in the U.S. diet. Sodium helps balance fluid and electrolyte levels in the body. This balance can affect blood pressure and kidney and ...

Salt and sodium are often used interchangeably, leading to confusion about your health. Learn the difference,

plus tips to reduce your sodium intake.

Although sodium is the sixth most abundant element on earth and comprises about 2.6% of the earth's crust, it is a very reactive element and is never found free in nature. Pure sodium was ...

The EU-funded SPRINT project will optimise and demonstrate two safe, sustainable, and cost-effective quasi-solid-state sodium-ion batteries tailored for stationary ...

A Key Step for European Energy Storage The ATENA+ project aims to produce sodium-ion battery cells in Europe, demonstrating their techno-economic feasibility across ...

ATENA+ is scaling up sodium-ion batteries to make energy storage safer, more affordable, and environmentally sustainable, shaping ...

Hyponatremia is the term used when your blood sodium is too low. Learn about symptoms, causes and treatment of this potentially dangerous condition.

Bringing together 17 partners (8 industry, 2 SMEs and 8 academic partners) from 11 European countries, SPRINT is an ambitious 46-month project that aims to revolutionise the ...

Many recipes call for salt, and many people also salt their food at the table. Condiments also may contain sodium. One tablespoon of soy sauce, for example, has about 1,000 mg of sodium. ...
