Does Lyon Metropolis have a solar cadastre?

Lyon Metropolis also developed a solar plan in 2022 and a solar cadastre to help professionals, inhabitants and cities to identify the solar potential of any kind of building. Many energy communities have arisen and contribute to photovoltaic development.

What makes Lyon a great region for cleantech?

The cleantech sectors, driven by full innovation and growth ecosystems, are strategic for the Lyon metropolitan area. A region with a reputation for excellence, where professionals in the chemicals & materials industries, transport & mobility and energy transition sectors find the right conditions for sustainable growth.

What is a 'zero energy' neighborhood in Lyon?

The most renowned one is the Confluence neighborhood program, between Rhone and Saone, Lyon's two rivers, where a lot of zero energy buildings are on development. ALEC Lyon is involved in the design, update and implementation of the local guideline for green efficient housing construction since 2005.

How does Lyon contribute to cleantech innovation?

The Lyon metropolitan area offers 4 major sites that contribute to the dynamics of cleantech innovation. Each of them mobilises skills and resources to assist you in setting up and developing your business. This district hosts numerous experiments of innovative services, calling on new technologies and community involvement.

Our products are widely used in home energy storage, electric forklifts, solar systems, golf carts, and RVs. Guided by the mission of "Green Planet, Low-Carbon Guardian," ...

The Metropolis set up specific incentives for massive development of thermal renewable energy : wood energy boiler, thermal solar panels and geothermal energy. ALEC Lyon supports the ...

With an envelope of 54 million euros - the largest budget in France for environmental technologies - the Lyon

metropolitan area offers entrepreneurs a favourable and innovative environment to ...

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 627 locations across France. This analysis provides ...

M&#233;tropole de Lyon, the local government, is aiming for a tenfold multiplication of solar use on its territory by 2030. Lyon's hotbed for solar is La Confluence, the neighbourhood ...

The solar event in Lyon illustrated how expectations of French solar remain big despite lower-than-expected development and issues related to regulations and carbon ...

Renewable energy, construction and buildings, HVAC and electrical engineering, wood energy - an ecosystem of players and solutions charts the course towards an energy-efficient, low ...

By using already urbanized spaces to develop solar energy, Our Energy La Soie combines energy efficiency and respect for the environment, while encouraging a more ...

Our products are widely used in home energy storage, electric forklifts, solar systems, golf carts, and RVs. Guided by the mission ...

The solar event in Lyon illustrated how expectations of French solar remain big despite lower-than-expected development and issues ...

As France accelerates its transition to renewable energy, the Lyon Energy Storage Power Station emerges as a critical solution to solar and wind power's inherent intermittency.

A nearly kilometer-long PV project featuring high-voltage direct current will be tested along the ViaRh&#244;na cycle route in the Rh&#244;ne Valley, marking a first for France.

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 627 locations across France. This analysis provides insights into each city/location's potential for ...
