---

The new national Energy Strategy 2022-2031, drafted by the Ministry of Economy and adopted in mid-March, aims to decarbonize Kosovo's energy sector and will likely lead to a massive ...

The solar power plant will help save more than 130,000 tonnes of carbon dioxide emissions annually. In total, 152 GWh of green electricity will be produced annually, benefiting Kosovo ...

In Kosovo, the integration of renewable energy sources, such as wind and solar energy, is progressing rapidly. However, challenges such as voltage stability and power losses need to ...

So, by acknowledging the immediate necessity for alternative sources of energy as well as the impact of solar energy development on its energy security, economic development, ...

Kosovo's ambitious plans for solar energy reflect a broader shift towards renewable power in the Western Balkans. The region has significant potential for solar energy, ...

These potential investors may be staying away from solar investment due to regulatory and technical barriers to solar PV investment in Kosovo. This report therefore contains a number of ...

The aim of the project was to design a techno-economically optimal PV-system at The University of Prishtina and to investigate the potential technical, social and economic impacts of ...

Kosovo's ambitious plans for solar energy reflect a broader shift towards renewable power in the Western Balkans. The region has ...

To increase the production of renewable energy and reduce the environmental impact of the coal operations for power generation in Kosovo
