Türkiye could increase solar capacity by 35% through 8GW hybrid solar integration with existing wind and hydroelectric plants

Turkish President Recep Tayyip Erdogan announced at the UN Climate Summit 2025 held Wednesday in New York that more than 60 percent of Türkiye's installed electricity ...

Hybrid solar power plants can help Türkiye achieve its clean energy targets by allowing solar potential to be utilised together with other renewable generation. According to ...

Türkiye added a record-breaking 6,818 megawatts of wind and solar power capacity in 2024, the Turkish energy and natural resources minister said Wednesday, pledging ...

Abstract This study develops a robust modelling and optimization framework for a hybrid photovoltaic (PV) and wind energy systems through a comparative techno-economic ...

In this report, we explore the level of wind and solar that Türkiye would need to install as part of a global 1.5°C compatible pathway. Our benchmarks ...

In this report, we explore the level of wind and solar that Türkiye would need to install as part of a global 1.5°C compatible pathway. Our benchmarks are also compatible with tripling ...

The country's strong performance in renewable energy--particularly in solar and wind--positions it as a leading regional hub for green investments. With the start of 2025, ...

Türkiye added a record-breaking 6,818 megawatts of wind and solar power capacity in 2024, the Turkish energy and natural resources ...

This study hypothesizes that increasing wind and solar based energy capacities in Türkiye have significantly influenced electricity market prices by reducing peak-hour costs, creating a duck ...

Abstract Türkiye ratified the Paris Agreement in 2021 and declared its intention to achieve the "net zero" target by 2053. The government announced a target of an increase of 1 gigawatt in solar ...

In this report, we explore the level of wind and solar that Türkiye would need to install as part of a global 1.5oC compatible pathway. Our benchmarks are also compatible with tripling ...
