We have successfully offered integrated energy storage solutions and products for customers all over the world.

We do offer larger off-grid systems from 10 to 100kW but they are 3-phase AC with high-voltage battery banks. The most important thing to consider though when choosing an off-grid system ...

Check out our first initial review of using 100% off grid solar system after 2 months of usage.

Only Solar Systems with compatible Battery Storage solutions will work during electric utility power outages. If your system is a Grid-Tied system without any Battery, the Inverter will ...

We have commenced retrofitting the Lufft and Davis stations with standalone solar power systems, enabling them to operate off-grid or in areas with limited electricity access. The ...

The Celebrity Sports Plaza's 100KW solar grid tied system, a partnership between Celebrity Sports Plaza, Inc. (CSPI) and First Philippine Solar Rooftops energized last November, was ...

Off-grid systems require a special inverter, battery management system, and additional safety equipment. Compared to a ...

We specialize in harnessing solar power for both small and large-scale installations. We offer a diverse menu of products and services--ranging ...

We have seen an immediate reduction in our energy bills and a change in our power consumption patterns since we installed the PVMARS off-grid solar power system.
