-----  
Will Claro & nubicom get 5G in Paraguay?

Claro and Nubicom win spectrum - Both companies secured 200 MHz each in Paraguay's 3.5 GHz band, with 5G rollouts expected in early 2026. New entrant faces challenges - Nubicom, an Argentine ISP without mobile infrastructure, must establish operations and build a network from the ground up.

How many MHz does nubicom have in Paraguay?

Paraguay's National Telecommunications Commission (Conatel) confirmed that Claro and Argentina's Nubicom will each receive 200 MHz in the 3.5 GHz band after submitting the only bids in the country's 5G auction. Claro will operate in the 3.5-3.7 GHz range, while Nubicom secured 3.3-3.5 GHz. Both allocations are split into four 50 MHz sub-bands.

Where is the first 5G base station made?

Back in July of last year, Verizon received the first U.S. manufactured 5G base station from a facility in Texas. Pictured is Verizon's CTO Kyle Malady holding some of the hardware. Image used courtesy of Ericsson

When will 5G start in Argentina?

Operators have six months to begin infrastructure deployment, with commercial 5G service expected to launch between March and April 2026. Nubicom, which currently provides fixed internet services in Argentina's Salta province but has no mobile infrastructure in either Argentina or Paraguay, will have to build a mobile network from scratch.

En total, son ocho sub-bandas de frecuencias las que licitó Conatel en la banda de 3.500 MHz, destinadas a la implementación de la tecnología 5G en el país.

During the presentation of the plan, Nubicom explained that the deployment will be concentrated in the main urban areas of Paraguay, starting in Asunción and later extending to ...
