Corporate and government renewable energy investment has hit record highs, driving massive wind and solar expansion across the U.S. Find out what's fueling the boom.

The rise of "electrotech" - solar, wind, batteries and electrified transport, heating and industry - became the dominant engine of global energy growth, led by China's ...

London, August 26, 2025 - Global investment in new renewable energy projects hit a record \$386 billion in the first half of 2025, up 10% from the previous year.

Deloitte's 2026 Renewable Energy Industry Outlook indicates that amid policy changes, the industry is likely to focus on building resilience

Corporate and government renewable energy investment has hit record highs, driving massive wind and solar expansion across the ...

Solar and Wind Power: Solar and wind technologies are central to the renewable energy transition. Solar PV, especially, is poised to meet a significant share of global electricity ...

Explore what 2025 holds for clean energy--from solar and wind growth to storage innovations and grid modernization. Key insights from FFI Solutions.

London, August 26, 2025 - Global investment in new renewable energy projects hit a record \$386 billion in the first half of 2025, up 10% from the ...

The annual World Energy Investment report from the International Energy Agency (IEA) finds that, despite

geopolitical tension and economic uncertainty, investment in clean ...

With the new projects online, renewables (including wind, solar, geothermal and hydropower) and battery storage now make up 30% of the country's large-scale power ...

Over the past decade, China's share of global clean energy spending has risen from a quarter to almost a third, underpinned by ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

Explore what 2025 holds for clean energy--from solar and wind growth to storage innovations and grid modernization. Key insights ...

Over the past decade, China's share of global clean energy spending has risen from a quarter to almost a third, underpinned by strategic investments in a wide range of ...
