Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application.

Unlike a backup generator, it does not need to power up in order to start generating power. In other words, if you experience a power outage in your area, your machinery should not shut ...

A signal from the emergency systems will automatically and instantly unlock all locks connected to the power supply. All of the modules - DCM, CMR, TDM, and EIR - can be easily configured ...

If you refuse to settle for anything less than the best, the APC Back-UPS PRO 1500VA is the right uninterruptible power supply for you. Its 1500VA/900W capacity should be ...

How We Picked The Best UpsOur Top PicksThings to Consider in The Best Ups OptionsWhat Is A Ups?How Do I Connect to My Ups?The acronym UPS stands for Uninterruptible Power Supply. Essentially, if the power goes out, your devices shouldn't do. This allows you to shut down and save work or turn devices off safely. As such, UPS devices are rated for power (the amount they can supply) and LCD models will advise how run time they have in them too. See more on [pcguide](#).
